SUMMARY

React Native and iOS developer with production experience shipping cross-platform mobile apps, backed by deep native iOS work in Swift and SwiftUI. Comfortable across the wider React and Next.js web ecosystem, with a focus on turning product requirements into polished, performant interfaces.

SKILLS

Mobile & Frontend: React Native, Expo, React, Next.js, TypeScript, JavaScript, HTML/CSS

Engineering: Component & MVVM architecture, RESTful API integration, AWS, Performance optimization, Crash monitoring & analytics (Sentry, PostHog), Git

iOS & Other: Swift, SwiftUI, SwiftData, CloudKit, AVFoundation, Python, Java

EXPERIENCE

Frontend Development Lead

Mar 2025 – Present

Weevva Systems Ltd – St. John's, NL

- Lead frontend development for a tenant verification platform, owning web and mobile interfaces built with **React, Next.js, and React Native**.
- **Redesigned the core tenant report** into a clean, modern interface with modular panels and a refined visual hierarchy, raising readability and product polish.
- **Rebuilt the onboarding flow** into a streamlined sign-up → account type → payment sequence with a post-signup checklist dashboard.
- **Mentor junior developers** and lead sprint planning across GitHub Projects and ClickUp.

Mobile Application Developer

Jun 2024 – Mar 2025

Weevva Systems Ltd – St. John's, NL

- Shipped a production **React Native (Expo)** app, collaborating with product and design to define and build core features.
- Led mobile **performance optimization**, improving property-card and large-list rendering through caching and list virtualization.
- Built out the **crash monitoring & analytics stack** (Sentry, PostHog) and integrated **REST APIs backed by AWS** for authentication, listings, and verification.

PROJECTS

AudiNote

- Built an **iOS audio journaling app** with live transcription and timestamped playback using **SwiftUI**.
- Built a **real-time audio pipeline** (AVAAudioEngine) with live waveform visualization, auto-gain normalization, and on-device speech-to-text via Apple's **Speech framework**.
- Architected the app using **MVVM** with `async/await`, Combine publishers, and **iCloud-synced persistence**.
- **Tech Stack:** Swift, SwiftUI, AVFoundation, Speech, SwiftData, CloudKit

MedAlert

- Built an **iOS medication tracking app** with scheduling, reminders, and medication detail views using SwiftUI.
- **Designed and integrated a custom RESTful API** to provide fast access to Canadian medication and packaging data.
- **Tech Stack:** Swift, SwiftUI, Supabase, REST APIs

EDUCATION

B.Sc. in Computer Science

Expected 2027

Memorial University of Newfoundland

- **Relevant Coursework:** Software Engineering, Object-Oriented Programming, Data Structures & Algorithms
